I am Ezequiel Giampaoli, a 19-year-old Front-End Developer, studying and learning new technologies and how to develop in the working world.

I arrived in Victoria, BC on August 10th, and I am very excited to start working and getting to know the Canadian culture that I have been dreaming about for so long.

Likewise, I was through a lot of courses and learned to program. How to do it and what to do.

As a Learner, I thought that studying at a University was going to help me a lot in my purpose, and as said, I did it, I started my studies at **UTN** (National Technological University) in Argentina with a Diploma/Degree in Programming. As I thought, it helped me a lot to understand new and old things.

Sadly, I had to leave an uncompleted Degree because of my moving to Canada. But not without learning different technologies and things like C#, Microsoft SQL Server, MongoDB, Visual Studio, GitHub (Desktop), Database layout, and more.

Furthermore, I am coursing a Diploma/Degree in Web Development and Digital Applications in the **ISPC** (Higher Polytechnic Institute of Cordoba), which can be coursed online and that's great for my situation.

Here I Learned about Scrum, Git, GitHub, Python, Ethics of Programming, and a lot more.

I have learned by myself, about Python, Java, JavaScript, React, Ruby, CSS & HTML.

I did have a volunteer internship for a web development company, **Cordoba Hosting**, where I used WordPress.

And until June, I was doing a Web Developer Internship in **PA&A** where I used WordPress & Elementor to build web pages and React, JavaScript, HTML & CSS to start to develop a new web page.

As said before, I am passionate about programming languages. I have a desire to work in this area and I have a lot of energy to put on. I am eager to learn new things and learn much more about this field.

I hold a Visitor Visa for 2 years and as such, I will need sponsorship for a Work Permit.

Yours faithfully,
Ezequiel
